

About Care Coordination Continuing Education Hours:

Per <http://dhss.alaska.gov/dsds/Documents/regspackage/CareCoordinatorCOPs.pdf> B. Training 3., care coordinators must submit proof of attendance and successful completion of 16 annual hours of continuing education to apply for renewal of certification. SDS Training offerings can qualify as required continuing education hours (CEH). Please see the table of class listings below for CEH hour equivalents. Most SDS training individual classes award a certificate of successful completion. SDS training provider meetings, information sharing webinars, and self-paced training or exams are not available as CEH. Please note: **SDS Training courses that you are taking to complete required training for certification cannot simultaneously qualify as CEH. You must complete CEH separate from the training requirements for certification. You will need to earn a certificate of course completion as described above for the course you need to apply/reapply to SDS for certification.**

Use the table or calendars below to register for individual classes.
